SUMMARY

BTech Computer Science and Design graduate with foundational knowledge in software development, web technologies, and databases. Skilled in HTML, CSS, JavaScript, Firebase, Git/GitHub, and basic Python and PostgreSQL. Experience in developing academic and personal projects with authentication systems, database integration, and role-based access control. Familiar with object-oriented programming, debugging, SDLC concepts, and problem-solving. Seeking an opportunity as a Software Developer Trainee to enhance technical and development skills.

PROJECTS

CampusResolve – College Complaint Management System

alanbose-dev.github.io/campusresolve/ Built a role-based web app for registering, tracking, and resolving institutional complaints. Implemented Firebase Authentication and Firestore for access control and real-time updates. Developed admin-side features for complaint and task management.

SmartAlloc – Budget Planner Web App

<http://smartalloc.vercel.app> Developed a budget management web application for tracking income, expenses, and budgets using HTML, CSS, JavaScript, and PostgreSQL. Implemented responsive UI, database integration, and financial record management features.

NOVA – Next Gen Opinion and Voting Arena

<https://team-ielect.github.io/nova/> Developing a digital voting platform for conducting elections in colleges, organizations, and communities from anywhere. Built with secure voting, election management, and live result features using a user-friendly interface. Supports both online and physical voting experiences for different types of elections.
