Professional Summary

B.Tech Computer Science and Design graduate (CGPA: 7.19) with hands-on experience building full-stack applications using Java, Spring Boot, React, PostgreSQL, JavaScript, and Firebase. Developed and deployed applications involving REST APIs, authentication, role-based authorization, CRUD operations, database integration, and responsive user interfaces. Strong foundation in object-oriented programming, SQL, and software development fundamentals, seeking an entry-level Software Developer role.

Technical Skills

- **Programming Languages:** Java, SQL, JavaScript, Python
- **Backend:** Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, Maven
- **Frontend:** React.js, Vite, React Router, Axios, HTML5, CSS3
- **Database:** PostgreSQL, Firebase Firestore
- **Security:** JWT, BCrypt, Role-Based Authorization
- **Concepts:** Core Java, OOP, CRUD Operations, Entity Relationships, DTOs, Bean Validation, Exception Handling, SDLC
- **Tools:** Git, GitHub, Postman, Eclipse IDE, VS Code

Projects

Opervia – Multi-Organization Internal Operations Management Platform Java, Spring Boot, React, PostgreSQL

- Developed and deployed a full-stack multi-organization platform for managing organizations, users, departments, invitations, request categories, and internal service requests.
- Built REST APIs using Spring Boot, Spring Data JPA/Hibernate, and PostgreSQL with layered Controller, Service, and Repository architecture.
- Implemented JWT authentication, BCrypt password hashing, role-based authorization, and organization-level data isolation for protected resources.
- Developed request workflows with status transitions, search and filtering, dashboards, comments, and audit history, with responsive React interfaces integrated through Axios.
- **GitHub:** github.com/AlanBose-dev/opervia
- **Live Demo:** opervia-phi.vercel.app

CampusResolve – College Complaint Management System HTML, CSS, JavaScript, Firebase

- Developed a role-based complaint management system enabling students to submit, track, and manage complaints through dedicated student and administrator dashboards.
- Integrated Firebase Authentication and Firestore to implement secure login, role-based access control, real-time complaint tracking, and status updates.
- Built responsive user interfaces using HTML, CSS, and JavaScript for consistent usability across desktop and mobile devices.
- **GitHub:** github.com/AlanBose-dev/campusresolve
- **Live Demo:** alanbose-dev.github.io/campusresolve

NOVA – Digital Voting Platform HTML, CSS, JavaScript, Firebase

- Built a web-based digital voting platform supporting voter authentication, candidate management, election administration, and real-time result tracking.
- Integrated Firebase Authentication and Firestore to manage authenticated users and election data with real-time updates.
- Designed responsive interfaces and voting workflows for accessible use across desktop and mobile devices.
- **GitHub:** github.com/Team-iElect
- **Live Demo:** team-ielect.github.io/nova

Education

Bachelor of Technology in Computer Science and Design 2022 – 2026
Vimal Jyothi Engineering College, Kannur CGPA: 7.19
